Average fee one hour coaching session* ¹	\$229	277

Notes on the data provided:

*¹ Survey respondents provided annual revenue data in a variety of different currencies, depending on the country in which they reside. In order to provide a common reference point, the revenue figures were converted to US dollars based on international exchange rates published by the World Bank. It should be noted that the US dollar revenue figures do not take account of differences between countries in the prices of goods and services. The purchasing power of a dollar revenue figure will be higher in countries or regions where the average price level is lower than in the US. Similarly, the purchasing power of a dollar revenue figure will be lower in countries or regions where the average price level is higher than in the US.

Please note that respondent base sizes for country, regional and global data vary considerably; therefore, please exercise caution when making comparisons between these statistics.
